

INSARAG Team Leaders Meeting 2019

Santiago de Chile, 8-11 October 2019

Topic

- 1, Manual C and the proposed introduction of a Classification Handbook
- 2, Is the reporting system for an IEC/R meeting the requirements of all stakeholders.

Facilitators/Note Taker

Paul Burns Facilitator
Dewey Perks and Tsukasa Katsuba Note Takers

Three Key Discussion Areas:

- 1, Discussion on advantages /disadvantages of have a Classification Handbook on INSARAG .org
- 2, The present reporting system for and IE/R, is the colour system and advisory notes meeting the needs of the team.
- 3, Does the present recording system for an IEC/R meet quality assurance or can the system be Improved to capture this.

Three Recommendations/Feedback

Overwhelming endorsement that Manual C be separated into Manual C and a Classification Handbook which would reside on INSARAG .org

Opinions regarding the colour system are mixed, while some favour and others believe it has fulfilled its need and should be replaced. Also emphasis on the written report needs to direct and useful and start of a corrective action plan. Question raised, is their still a way to use the colour system were a team can get a red and still receive a classification?

INSARAG Team Leaders Meeting 2019

Santiago de Chile, 8-11 October 2019

Reporting timeline is that the classification package should be finished and submitted in not more than 30 days. **Suggestion**, draft presented before departure, 7 days later report submitted to Secretariat , 7 days later final report given to Team.
