

Topic

Quality assurance NAP / Classification Light

Facilitators/Note Taker

Johannes Gust (F)
Irakli West (NT)

Three Key Discussion Areas:

1. NAP

NAP is as sort of pre-classification. Ideally, teams that have undergone NAP should have same technical level as IECed teams

NAP is an assurance for the national focal point

With NAP in place: teams go through 2 control „exams“ (NAP and IEC)

NAP

- can be a minimal standard for cross-border deployment
- facilitates incoming help

Potential problem: Simultaneous NAP (eg as heavy) and IEC (eg Light) – who stops?

2. “Control points”

- Control teams from the inside (how many, how good)
- There are control points throughout the entire process – internal, and external (INSARAG)
- Loop

3. Possible to combine Accreditation and Classification?

- In many cases, first team classifies, then NAP is introduced

Three Recommendations/Feedback

1. What guidance can be provided to focal points

**INSARAG Africa-Europe-Middle East
Regional Meeting 2018
17-18 October 2018, Aix-en-Provence, France**

DIRECTION GÉNÉRALE
DE LA SÉCURITÉ CIVILE
ET DE LA GESTION DES CRISES

2. Define “Focal Point”

3. IEC Light together with Heavy
